

# Have you been slipping on the investment road? PKF Scenario delivers your anti-blocking system

PKF

© BESTBRK/ISTOCK

**Sudden political decisions, global events and disruptive patents fundamentally change the planned investment route. What effect do these events have on your value drivers?**

## **The danger of unpredictable situations**

Analyzing the decisive value drivers is no longer sufficient in a multi layered world. It has never been more difficult to set the course for business when external parameters expand its influence on your investments. Is there no way to quickly and easily evaluate these ad hoc scenarios and derive a basis for decision-making?

## **PKF Scenario creates planning security**

We provide a suitable tool that helps you to avoid losses. Create a data-based decision-making aid with transparent integrated reporting. Based on automated digital processes we can provide you with a powerful Finance Performance Management Tool.

This tool has powerful attributes and the safety function similar to an ABS:

## **Analytical Powertool**

The certainty of reliably evaluating data becomes reality. Improve your strategic asset allocation and stabilize returns by making your corporate data readable and understandable.

## **Better Investment Decisions**

A holistic view of the P&L, balance sheet and cash flow provides a customized overview for liquidity and future planning. We also integrate macro-economic considerations into your value driver trees so that you can quickly evaluate new situations!

## **Simplified Transparence**

Give your stakeholders reliable reports "at the push of a button" and define new standards in transparency and investor relations by efficiently designing your reporting.

*If you need your ABS for necessary grip on the investment road, then contact us!*

## *Your PKF contact*
