

# PKF and DyeMansion - A practical blueprint for your success

© BESTBRK/ISTOCK

**How the cooperation of start-ups with PKF Munich enhances their decision-making agility and thus contributes significantly to the success of the company.**

## DyeMansion - The 3D Champion

With a 3D printer, almost anything can be printed, no matter what size, shape or material. Mostly, however, colorless products with roughened surfaces are created. In just the post-processing DyeMansion saw enormous market potential. They set new standards with their developed technologies for the post-processing of 3D-printed plastic parts. In the meantime, the Munich-based company has become the world market leader in its niche.

## PKF and DyeMansion - Success Story

Growth is one of the most important success factors of young companies. Rapid growth places high demands on the start-up. Financial figures threaten to become confusing, making it difficult to make the right decisions.

A suitable Financial Performance Management (FPM) tool can help here. Right from the start, PKF IVT supported DyeMansion by taking over the financial accounting and further questions. The good cooperation then persuaded DyeMansion to decide in favor of LucaNet and a further cooperation with PKF.

## PKF Starter Kit - Service Provider

In the course of this, PKF IVT would like to use the experience gained from the partnership with DyeMansion to support young companies in the area of financial performance management, so that they can fully concentrate on their core business.
