

No Panic on the Titanic – create ad-hoc reports and take the right decisions with SmartInsight from CCH Tagetik!

© BESTBRK/ISTOCK

Together with our partner software from CCH Tagetik, we provide you with a professional solution for the implementation of ad hoc reports

When the iceberg suddenly appears...

In addition to regular standard reports, current occasions also require fast and reliable reporting. Ad hoc reporting addresses this issue and complements standard reporting with individual reports that can be created in real-time. Ad hoc reports are very well suited for "on-the-fly" analyses or non-recurring reports that aim to solve a specific challenge.

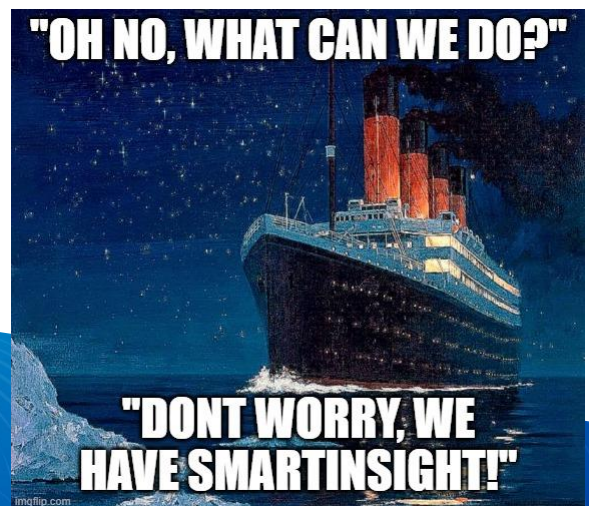

...it must be safely circumnavigated.

SmartInsight is a separate module of the corporate performance management software Tagetik. It allows users to quickly and easily extract information from the Tagetik database directly from the browser. In line with the classic Tagetik Forms, the user interface resembles an Excel spreadsheet. To create the report matrix, all elements can be simply dragged and dropped.

Additionally, the classic Excel functionalities can be used. Thus, reports can be quickly transformed into the desired format. Diagrams can also be created easily. Hence, SmartInsight enables reliable and descriptive reporting, which allows you to take the right decision.

We support you as the captain of the ship

Avoid the iceberg thanks to reliable ad hoc reporting with CCH Tagetik SmartInsight! Our experienced team of specialists will gladly provide you with non-binding expert advice on ad hoc reporting.
